4. Space is needed for support programs such as health room/Nurses's office, resource room, guidance & counseling.
5. The gymnasium is not large enough for group physical education activities.
6. The building needs to be renovated: wiring, plumbing, lighting, etc.
7. We have an asbestos problem in the plaster that was just discovered this summer when we were testing prior to remodeling. It has delayed the remodeling & upgrading required to meet fire marshall requirements. We are not certain what we will be doing or what it will cost. The building does not meet (not even close) handicapped accessibility requirements. It could cost us \$250,000-500,000 to meet these requirements. It would be best to apply the money toward the construction of a new building.

| | 14 XX | Define site??? We have several buildings but they are all located on one site. Doubt if I plan to move them from place to place on this land. |
| 21-0015 | 6 | We passed a bond issue for an addition to the Jr.Sr. High school in Sept. 1990. The bond issue for a new elementary school did not pass. |
| | 9 | Most items that were delayed the previous year will be taken care of due to the passage of the bond for the High school. This bond did include improvements at the Elementary school and improvements at the High school. We still have many problems to be solved at the Elementary school. |
| | 11 | Technological advancements are inhibited somewhat at the elementary school. |
| | 12 | We have an unanticipated asbestos problem in the plaster at our elementary school that was not discovered when originally inspected. |
| | 13 | Our elementary school does not meet handicapped accessibility requirements. |
| | XX | It will not make sense to put the amount of \$ into our elementary building to try to solve the asbestos problem, accessibility problems or to meet the fire marshall's expectations. It would make more sense to put the money into a new facility. |
| 28-0001 | 15 | Number of portable units on sites with permanent facilities. |
